

JEWELER KILLS DENTIST ABOUT FORMER'S WIFE

A. L. Lee, of Samson, Shoots Dr.
H. D. Ward on Rear Porch of
Former's House Sunday.—
Acquitted at Preliminary.

(Special to The Eagle.)

Samson, Ala., June 14.—Dr. N. D. Ward, a dentist, was shot and killed about 9 o'clock Sunday night by A. L. Lee, a jeweler, on the rear porch of Lee's home. Alleged illicit relations between Lee's wife and the dead man was the cause of the tragedy.

Monday morning Lee was given a preliminary hearing when he was discharged.

You keep cooler if your money is in the bank. Buy your groceries at Greene's 10c Store,—deposit the difference and watch your bank account grow.

Trading at Greene's 10c Store is just like getting an increase in your salary, for they sell more "for less."

Want some good fried chicken? Phone 389.—Greene's 10c Store, they'll send you one.

BOSTON MAKED BEANS

J. M. Smythe brought in a sample of some navy beans, the kind that helped to make Boston famous, which he raised in his garden at home. He thought that they wouldn't grow and do well here, but he found that they do, and has planted a peck after oats, and expects to get a good crop.

New lot of enamel ware on sale at Greene's 10c Store.

It pays to trade at Greene's 10c Store,—they sell more for less.

Name Of Sender Is Needed On Parcels

Now Mr. Who-ever-you-may-be, and the same applying to Miss So-and-so, if you write your name on packages, particularly parcel post packages, that you put in the postoffice destined to some point somewhere, you will confer a great favor on the postal clerks, and facilitate matters generally.

Sometimes packages are mailed without being self-addressed, and in such cases, should the name of the party to whom the package is sent come off or be defaced in some manner, your package would have to be sent to the dead letter office for identification. That takes time, and in the interim you would be wondering what had become of the package.

With but little trouble, every one may write their name and address on packages mailed at the postoffice.

Quick service, free delivery,—that's Greene's 10c Store you're looking for.

WILSON DRAVED STORM TO HONOR CONFEDERATES

Washington, June 13.—When President Wilson drove through a violent wind and rainstorm today to attend the Confederate Memorial day exercises at Arlington National Cemetery, he found that the crowd assembled for the ceremonies had broken in a wild rush for electric cars and automobiles. The few people remaining had taken refuge under trees and in some small tents near the speaker's stand.

For half an hour the president's automobile stood in the driving rain. Mr. Wilson from time to time peered through the water-smeared windows of his car, much concerned over how the people outside were faring. A short distance away he spied two or three women huddled beneath a short thick tree, greeting him with frantically waving umbrellas. He beckoned in vain for them to come in the car. They either were timid about visiting the president of the United States under such circumstances or afraid of the wetting they would get between the tree and the car.

You hot to bake cake, especially when you can get Stone's cakes fresh every day,—yes they are at Greene's 10c Store.

Mr. Frost, of the Alabama Auditing Company, of Montgomery, is auditing the books of the Home Gum Company.

Not near so difficult to keep cool if you buy your groceries at Greene's 10c Store. "They sell more less."

Fruit jars, fruit jar rubbers and jar rubbers at Greene's 10c Store.

MRS. P. S. JONES.

At midnight Saturday night, Mrs. P. S. Jones went to her eternal rest after a long life spent in loving helpfulness. Friends and loved ones who for weeks had kept vigil by the bedside of this sweet spirit saw no evidences of suffering, for "God is kind even in death, and nature like a gentle mother soothes us and holds us gently to her breast ere she puts us to sleep." It was befitting her life of gentleness that death should come at the end like an April zephyr and kiss her to sleep.

A large number of friends gathered at the family residence on East Newton street at 9:00 o'clock this morning to pay a last tribute of respect to the deceased.

A choir sang beautiful and appropriate hymns and Dr. McNeill, her pastor, read the beautiful ritual of the church she loved so well and at whose altar many years ago she received the witness of the Spirit. Mrs. Jones had been in feeble health for some time and death was due to infirmities incident to her advanced age. She was 84. She is survived by two sons, J. W. Jones of Brockton, and M. H. Jones of Coffee, and three daughters, Miss Mattie Jones and Mrs. S. R. Anderson of this city and Mrs. O. M. Hill of Waycross, Ga. Interment was made in the city cemetery.

ARTIC SKIPPER STARTS OUT IN SEARCH OF THE MAC MILLAN EXPEDITION

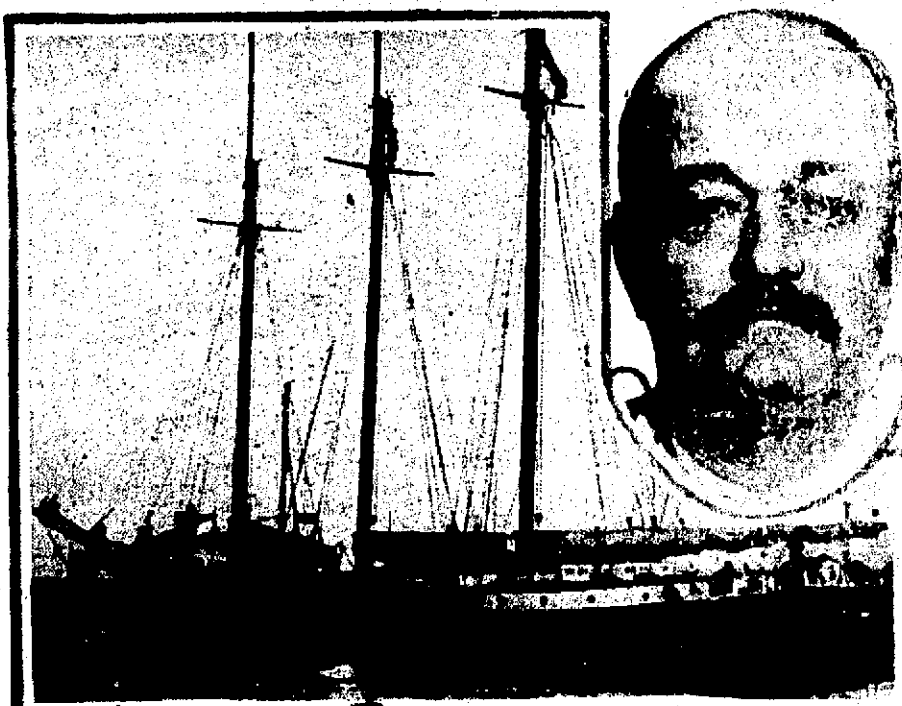

Photo by International News Service.

The Mac Millan Relief Expedition Ship, George B. Olcott, and her Commander Capt. Pickles.

New York, June 14.—The Mac Millan Relief Expedition of the American Museum of Natural History began on Wednesday afternoon when the three-masted auxiliary schooner, George B. Olcott, left her pier in the East River, bound for Etah, North Greenland.

The relief party is headed by Dr. E. O. Hovey, chairman of the Museum Committee that sent Donald B. Mac Millan in 1913 to locate "Cracker Land," which has since proven to be a myth. Besides Dr. Hovey, the relief party consist of Capt. H. C. Pickles, a veteran mariner of the Arctic seas, who has stocked his staunch vessel with provisions for two years in anticipation of a lengthy stay in the Arctic regions.

Packing Plant Agitation For Dothan

Dothan Eagle:

I attach hereto a letter I have recently received from Mr. John W. Greer, secretary of the Monticue Packing Plant. You will note this plant after six or eight months operation seems to have settled several vital points in connection with the operation of a rural packing house,—points which have heretofore been the subject of controversy.

1st. Pound fed hogs are as good as any other.

2nd. The small rural packing house can make as good meat products as Chicago or Kansas City.

3rd. There is a ready market for the output.

4th. Hog cholera can be kept in check and gradually exterminated by the use of serum.

5th. A packing house can be made self-sustaining from the start and should reach a dividend basis by the third year.

6. If a packing house is built the farmers will raise the stock.

When the Monticue packing plant was first proposed it was expected that it might reach a dividend basis and be able to secure sufficient hogs and cattle to run continuously, by the end of the second year.

The indications are now these expectations will be more than realized. I am submitting these conclusions and data to the business men of Dothan and S. E. Alabama and other neighboring sections for the following: We need and must have a packing plant in S. E. Alabama. We ought to get busy on the proposition at once. Dothan being the

logical geographical location for such a plant it should take the initiative.

As to the immediate future of such a plant here, Dothan is far better situated from every standpoint for such an industry than Monticue, and according to the government reports there are far more hogs and cows within a radius of 100 miles.

Now I am aware, at first thought and ordinarily, it would seem no easy matter to raise the necessary capital for such an enterprise at the present time. However, this being in no sense an ordinary time, it behooves every man of us to do the extraordinary,—the which can be done! Therefore, in an extraordinary way, this thing is feasible and practicable and should be done.

We must bear in mind that the building of such a plant is not merely a dividend proposition. It is far more than this,—it is a life saving apparatus. Under ordinary circumstances such a plan as I propose would not perhaps be advisable or successful, but at the present time I believe it could be successfully executed.

My suggestion is that the counties of S. E. Alabama and nearby Florida counties get together and build a plant. What would be difficult for a few to attempt at the present time will be simple if taken up en masse. I suggest a central committee composed of representatives of Houston, Pike, Dale, Geneva, Coffee, Henry, Jackson county, Fla., and other counties if possible to secure their co-operation. This committee to begin at once to

thoroughly organize every community and beat in these counties in order that the proposition might be placed squarely and forcibly before each community, the idea being to secure a small amount from every one. There are men in S. E. Alabama that, owing to their large interests at stake, could well afford to invest \$25,000 in this enterprise in order to get it going, and some will no doubt respond liberally, but generally speaking the proposition will have to be financed by small subscriptions. This is entirely practicable and feasible.

There isn't a community in this section but that realizes fully the menace of the boll weevil, and the importance of raising food crops and hogs. In my opinion, practically the only difference in raising the necessary capital at this time and in more prosperous times, would be that the area from which subscriptions are to be sought would be larger and more general than in other times. There are enough people interested and sufficient money in the territory suggested to build this plant. Numerous small amounts of stock from ten to one hundred dollars could be issued to farmers generally, with the banks in each community acting as trustee for its respective people,—these amounts payable this fall.

If this plan is taken up in a fully organized way and pushed aggressively I believe it would be successful. Think of the load it would lift from Southeast Alabama!

(Continued on Page 7)

LUMBER MILL STARTS JULY 1

Moreland Manufacturing Company
Leaves Flowers Lumber
Plant.—C. H. Moreland,
Manager.

The industrial outlook for Dothan is brightened following the announcement made today that the Moreland Manufacturing Company will begin operations July 1. This plant has not been running full time in about a year.

With this company working a full crew by July 1, business will likely begin to pick up in the lumber line in Dothan, and more money will be paid out in salaries in this city. This money, or a goodly percentage of it, will be spent in Dothan, and will be another item in making Dothan a more prosperous city.

The company will do a general mill work business, and will be prepared to fill large and small orders promptly, good service being promised the trade. C. H. Moreland will be manager of the company. He has for two years been manager of the Carleton Lumber and Lumber Company, and has had an extensive experience on the road.

COURT IN SESSION.

An adjourned term of the Circuit court, with Judge H. A. Pearce presiding, is in session this week, and will probably last about three weeks. Over 200 cases are on docket.

If you are in debt, pay cash for your groceries and everything else you buy. Trade at Greene's 10c Store. Save the difference and you'll soon have enough to pay you out,—then you can "keep cool."

Mr. and Mrs. S. O. Williams, Mr. and Mrs. J. P. Fay and children, went to Eufaula yesterday, visiting relatives.

If you want to keep comfortable why don't you pay cash for your groceries—by them at Greene's 10c Store,—you can save 20 to 25 per cent every month.

The ladies of the Headland Avenue Baptist Church will have charge of the Palace Theatre Tuesday, June 15. The proceeds will be appropriated to some worthy cause fostered by the church.

The play for this occasion will be *St. Elmo*, a dramatic six reel masterpiece, written by an author of great renown, Augusta Evans Wilson. The play sparkles with interest and enthusiasm from the beginning to end and stands as one of the greatest of its kind ever written. This famous author is well known throughout Alabama, and her works throng with interest to all. A large attendance is hoped for both afternoon and night.

Mrs. E. Foster.
Pres. W. M. U.

MASONS PLAN FOR BIG DAY

Public Installation of Officers in
Dothan Friday, June 18.—
Program Being Prepared.

In commemoration of St. John the Baptist and St. John the Evangelist, elaborate plans are being prepared for a double ball in Masonic events in Dothan Friday, June 18, at which time Ladies' Day will be observed and officers for the two local lodges will be publicly installed.

Dothan Lodge, No. 466 elected officers Saturday night, while Pythagoras Lodge, No. 458 will elect officers Tuesday night. All these officers will be installed Friday, June 18.

The program has not been completed, but there will be addresses by prominent men in Macon, and by members of the Eastern Star, an auxiliary organization for women.

The program will be carried out in the temple, North Foster street. Dinner will be served at 1 o'clock, and refreshments will be on tap all day.

Officers elected by Dothan Lodge Saturday night were: Fred H. Martin, Worshipful Master; A. L. Hix, Senior Warden; C. Fowler, Junior Warden; E. L. Forrester, treasurer; E. C. Hall, secretary; J. W. Williams, tyler.

NO BODY PEDALS THIS HOT WEATHER

Show How Attachment Converts Bicycle Into a Motor Cycle.

If you see a bicycle going along the street at a good rate of speed while the rider sits comfortably in his seat with no effort to pedal at all, you will know at once that it is the subject of this article, the bike with the new Shaw Attachment.

This is the latest device to convert your bicycle into a motor cycle that will take you anywhere and what is more "get you back." It looks like a fire extinguisher attached to the frame and in two and a half horse power, all kinds of speeds, warranted not to back up or back, is gentle and can be driven by a perfect lady,—we mean driven perfectly by a lady. However, Leo Bush, at the Edison Drug Co., can tell you all about it, as he is the agent and is very enthusiastic about the new motor.

FOUND GALLON OF MONEY
Ed Leggett, who lives on the corner southwest of Dothan, has just found a gallon of money. Sheriff John A. May and Deputy Alex May on a charge of stealing the prohibition laws, have been paid a fine of \$100,000, partly paid in the court near Leggett's residence.

CALOMEL IS MERCURY! IT SICKENS! ACTS ON LIVER LIKE DYNAMITE

"Dadson's Liver Tonic" Starts Your Liver
Better Than Calomel and Doesn't
Sicken or Make You Sick.

Listen to me! Take no more sickening, calomeling calomel when bilious or constipated. Don't lose a day's work! Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with your bile crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knuckled out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour just take a spoonful of harmless Dadson's Liver Tonic on my guarantee.

Here's my guarantee—Go to any drug store and get a 50-cent bottle of Dadson's Liver Tonic. Take a spoonful to night and if it doesn't straighten you right up and make you feel fine and vigorous by morning I want you to go back to the store and get your money. Dadson's Liver Tonic is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not sicken or make you sick. I guarantee that one spoonful of Dadson's Liver Tonic will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dadson's Liver Tonic will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.

WADE'S WEEKLY LETTER

MAKE HAY WHILE THE SUN SHINES

Imperative duty demands that I again call the the farmers attention to the hay crop. The people of this State have on hand now the largest supply of cow peas that it has ever had in a good many years. There are thousands of bushels listed for sale with the Bureau of Markets of the Department of Agriculture. The prevailing price of cow peas is \$1.25 per bushel and is one dollar cheaper than last year.

There is no reason why the stubble lands cannot be made to produce an abundance of hay this year at the minimum cost due to the increased area of oats and wheat just harvested and the plentifulness and the cheapness of peas. Alabama needs this hay as evidenced by the three million dollars worth of hay shipped into the State last year.

The actual value of cow pea hay is very good, in fact it is about the best general hay available on all classes of soil and conditions of farmers. It is the poor man's best crop. The pea crop has another value often not seriously considered and that is the nitrogen left in the soil for the next year's crop the value of which ranges from three to eight dollars per acre as a fertilizer. This value is of course, dependent upon the success of the crop and how the land has managed.

next year. The time best suited to sowing peas for hay is during the month of June. July is not too late but is objectionable for the following reasons. Late pea vine hay is more subject to "Blue Mould" which attacks the vines worse during cool autumn weather. Second, late harvesting of pea hay make it difficult to cure as the days are short and cool necessitating too long a weather risk while curing, often resulting in weather damaged, moldy condition.

Let us all co-operate for more hay, a better soil, more live stock, more manures and better crops. Sow in June if you can, but sow in July rather than not at all. At the proper time we will call your attention to the best known methods of harvesting and curing hay.

Jas. A. Wade,
Commissioner.

A LETTER ON DIVERSIFIED FARMING.

Editor The Eagle,
Dothan, Ala.

My Dear Sir: As your county is a member of the Diversified Farming Association of Central Alabama, I take the liberty of reporting through you to your readers the recent organization in Montgomery county of the Potato Growers' Association. It is the plan of this organization to encourage the formation of Potato Growers' Associations in each county in Central Alabama. We will be delighted to furnish a copy of our Constitution and By-Laws to any one interested in the subject. The object of our organization as set forth in our Constitution is to promote the growing of potatoes in this county and territory contiguous thereto. It shall be the policy of the Association to glean all the knowledge and information possible relative to growing, grading and marketing potatoes and to disseminate such knowledge and information through schools of instruction, pamphlets, lectures, etc. The programs include all the practical phases of these topics, and our members express themselves as greatly benefited by coming together and hearing experts and comparing experiences.

Our last meeting held June 11, was addressed by Commissioner of Agriculture Jas. A. Wade, who spoke on "What the State is Doing Through Its Market Bureau." Prof. J. C. C. Price, the potato expert of the Agricultural College at Auburn, who spoke on "Growing, Storing and packing Potatoes." Mr. A. D. Rich, an experienced Carolina potato

grower who has recently moved to Montgomery county, gave a practical talk on "Growing Potatoes for the Commercial Market," including methods of cultivation as well as fine points of marketing and shipping. Bulletins Number 183 on "The Irish Potato" by J. C. C. Price of Auburn, and Number 184, just from the press, on "Local Fertilizer Experiments with Sweet Potatoes," prepared by Prof. J. E. Dugger, and a special bulletin of the United States Department of Agriculture on "Sweet Potatoes Growing in the Cotton Belt," were distributed to the members. It is suggested that your readers who are interested in potato growing may obtain copies of these bulletins by writing to Auburn for them.

The potato comprises a large item in our bill of fare, and if Alabama can grow enough potatoes to feed herself, she can save several millions of dollars that she spends elsewhere for them. For instance, the records show that Montgomery county spent a million and a half dollars last year out of the State for potatoes. Of this sum, \$150,000.00 was paid in freight rates. The director of the Diversified Farming Association for your county is Mr. John Sanders of Dothan.

I am sure that with the assistance of your Farm Demonstration Agent our director could easily organize the potato growers of your county into an association. When every community in Alabama is organized we will then be able to grow potatoes on such a scale that buyers can come to us and the question of a market will then be settled. Respectfully,
M. B. Owen, Sec'y.

MELON GROWERS.

Montgomery, Ala., June 11.—The Bureau of Markets offers its services to the melon growers of Alabama in the matter of securing buyers. The professional buyers are now in Florida and will move northward with the crops. Farmers in communities where there is a considerable acreage in melons are urged to send in the amount of the acreage to the Markets Bureau. These answers will be classified and forwarded to the buyers who will arrange their itinerary in accordance therewith. By co-operating with the bureau of melon

MRS. LYON'S ACHES AND PAINS Have All Gone Since Taking Lydia E. Pinkham's Vegetable Compound.

Terre Hill, Pa.—"Kindly permit me to give you my testimonial in favor of Lydia E. Pinkham's Vegetable Compound. When I first began taking it I was suffering from female troubles for some time and had almost all kinds of aches—pains in lower part of back and in sides, and pressing down pains. I could not sleep and had no appetite. Since I have taken Lydia E. Pinkham's Vegetable Compound the aches and pains are all gone and I feel like a new woman. I cannot praise your medicine too highly."—Mrs. AUGUSTUS LYON, Terre Hill, Pa.

It is true that nature and a woman's work has produced the greatest remedy for woman's ills that the world has ever known. From the roots and herbs of the field, Lydia E. Pinkham, forty years ago, gave to womanhood a remedy for their peculiar ills which has proved more efficacious than any other combination of drugs ever compounded, and today Lydia E. Pinkham's Vegetable Compound is recognized from coast to coast as the standard remedy for woman's ills.

In the Pinkham Laboratory at Lynn, Mass., are files containing hundreds of thousands of letters from women seeking health—many of them openly state over their own signatures that they have regained their health by taking Lydia E. Pinkham's Vegetable Compound; and in some cases that it has saved them from surgical operations.

growers of Alabama will be able to handle their product with less cost and get more satisfactory prices than they would without the competition from these professional buyers which the bureau will inaugurate.

Emmett A. Jones, chief of the bureau, says this is an important matter and the information asked for by the bureau should be forwarded as soon as possible.

IMMIGRATION AND MARKET BUREAU

By Emmet A. Jones

The volume of business that those business men who depend on farmers for their trade will do, and be exactly in ratio with steadiness of prices for farm products and the margin of profit farmers make when they sell. Big crops and good business are not always synonymous, and this applies to business men as well as to the farmers. The crops must be sold right. To help the farmers to do this is the mission of the Markets Bureau.

When the farmers are getting good prices, the wholesalers send their men out to sell to the retailers, and then they send large orders to the factories. The factories employ more men to make more goods and the employed men buy more of the manufactured articles. We claim that prosperity in the nation begins on the farm. But when prices for farm crops are low, no matter how large the crops are, the farmers are not so much in the market buying. Retailers do not stock heavily, then wholesalers keep their men off the road and the wheels of the factories stop.

CLAMS OF SALTS CLEANS KIDNEYS

If Your Back Hurts or Bladder Bothers You, Drink Lots of Water.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that irritate the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salt which removes the body's urinary waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 600 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jod Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will set fine. This famous salt is made from the acid of grapes and lemon juice, combined with bicarbonate, and has been used for generations to clean and stimulate the kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jod Salts is non-toxic; can be taken by a child; a delightful remedy for water drink. It is a powerful diuretic and takes new action on the kidneys. For this, also, it is a powerful remedy. What a relief it is to the kidneys. It is a powerful diuretic and takes new action on the kidneys. For this, also, it is a powerful remedy. What a relief it is to the kidneys.

SECRETARY BRYAN RESIGNS FROM CABINET

WILLIAM JENNINGS BRYAN.

As he appeared during his recent visit to New York

or do not revolve so rapidly, and laborers are without employment and without the ability to buy. No prosperity also ends on the farm.

A bushel of wheat sold at \$1.25 or a bushel of potatoes sold at 60c, or a bale of cotton sold at \$7.00 each, gives the farmer more buying power—more above cost of production—than three bushels of wheat at \$60, or three bushels of potatoes at 25c or three bales of cotton at \$45.00.

American farmers are naturally proud of the fact that they raise the greatest crops in the world. But what are they working for, crops or money? and how can they protect themselves in the distribution of the money the crops eventually sell for, as long as they do not control what they produce? Boards of Trade and Exchanges are operated to grind out fortunes for those who produce nothing, but manipulate the necessities of life, which millions of farmers wring from tens of millions of acres. Gambling, then, in the necessities of life, is a game that perpetually jeopardizes the welfare of farmers as well as successful business men.

What the Markets Bureau is accomplishing is to have farmers retain and hold the ownership of their crops until the real demand is ready for them.

WAYCROSS TEAM IS HERE

The Waycross team is here for a game with Dothan this afternoon and tomorrow. Gainesville, Fla., plays at Dothan Wednesday and Thursday, with Thomasville here the last two days of the week. The local team goes to Gainesville, Fla., for two games, June 21, 22, which concludes the first half of the present season.

CROPS TO FOLLOW OATS

Cowpeas, Soy Beans and Other Legumes Preferred.

By J. F. Dugger, Director, Alabama Experiment Station.

Prepared by Extension Service, Auburn, Ala.

As a rule, soil improvement crops are most advisable. Among these, first place is usually given to cowpeas. Late or Mammoth soy beans may also be drilled in promptly after oats, and cultivated for seed or hay.

Spanish peanuts may still be planted. But with both soy beans and peanuts there is greater danger of getting a stand after oats than on less open land.

Only if the land is very rich should corn follow oats, and then usually with peas in every other row, or in the middles.

There is still time for sweet potatoes, but on oat stubble the stand is often poor.

Sorghum may be planted, then corn or sweet potatoes, but it impoverishes the soil.

BEST VARIETIES OF COWPEAS

Some of the Best Varieties for Seed and Hay and for Disease Resistance.

By E. F. Cauthen, Associate Agriculturist, Alabama Experiment Station.

Prepared by Extension Service, Auburn, Ala.

Speckled Pea—The most widely known variety of cowpeas is probably Speckled pea, called by some Whip-poorwill or "Shiny." It has some vines and usually produces a good crop of seed. The pods do not burst open as soon as they are ripe and drop the peas on the ground. Harvesting may be delayed some time after the pods ripen.

If this variety is planted for hay it should be sown at the rate of one and a quarter bushels to two bushels per acre. The crowding of the plants forces the vines to grow more nearly upright, makes the mowing easier and increases the yield of hay.

ANTIPATHETIC.

"Do you think they will be happy together?"

"Is it likely? He's an irregular dog and she's a regular cat."—Puck.

PACKING PLANT AGITATION FOR DOTHAN.

Continued from Page One

However, to secure the desired results the personnel of the General Committee must be of the right sort. I would like to see Mr. G. H. Malone chairman of the Houston county committee, and then subsequently chairman of the General Committee. It will be necessary to have a well known and experienced business man at the head of the proposition. I think we ought to have a meeting here in Dothan at once looking to preliminary organization and the calling of a general meeting of representatives from the various counties. This initial meeting might be called by the newspapers of Dothan, and at once.

L. E. MORGAN

Following is the letter from Mr. Green:

Montreal, Can., June 5, 1915.

Mr. L. E. Morgan,

Dothan, Ala.

Dear Morgan:

Replying to your letter of the 1st, I beg to say that as yet no statement has been issued, but the indications are that the plant has not lost any money in the first six months of its operations. If anything it is probably a little bit ahead.

Answering your questions, set out in short.

Up to April 1, there were enough hogs and cattle to keep the plant running continuously. Since that time, we have been killing from one to four days a week. At present about two days in the week.

We have been drawing on a territory of about 150 miles. We have bought one load of hogs from Tennessee.

The peanut meat has gone like hot cakes. It is just a little bit better than any other kind. Shrinks a little, but the flavor makes up for that.

The outlook for the plant is very fine. Thus far we have handled 18,000 hogs and several thousand cattle, and the indications are that we shall handle from thirty to fifty thousand hogs within the year.

Cotton has been reduced about

WAR SERIES OF THE New York Times MID-WEEK PICTORIAL

twenty to twenty five per cent in this county. I do not think the elimination of cotton entirely possible or desirable. We must raise cotton, but we must raise it more economically. Stock will enable us to do that. I think its elimination would have a very depressing effect, although we could stand it better than section where they could not sell to k.

Cholera is bad, but we are fighting it with a will. We have two government men working constantly and the people are taking to the serum almost universally. We shall not be able to control it until we shut up the stock.

The effect of real estate in the county and the town is not yet very marked. Lands are holding their own, but there is not much activity. The land values of the town have strengthened perhaps, but land values in the county have changed very little.

It would require from a hundred to a hundred and twenty five thousand dollars to erect a plant in your city. Our plant cost a hundred thousand dollars, but the cold storage is too small and we shall have to enlarge it from thirty to forty thousand dollars. It requires about \$150,000 operating capital. The banks here supply that and take cold storage receipts for the meat as they do warehouse receipts on cotton.

The Andalusia people spent last night with us and we enjoyed them immensely. They seemed to enjoy their trip very much. There were about 65 of them. They came in cars. If you could bring a crowd of your business men here and some of your best farmers it would impress them immensely.

I am pleased to give you this information and if that is not explicit enough, write me again and I will make it more so.

We shall be glad to see you any time you can come. You have many friends here.

Sincerely your friend,
Joe W. Green

HOW TO SECURE MARKETS

The Bureau of Markets is endeavoring to induce growers of produce to sell outright to dealers instead of shipping on commission. It is said that many dealers prefer to quote a definite price rather than to sell goods on consignment. It may be asked how the farmer is to sell outright instead of shipping on commission. "The process is simple," says Emmet A. Jones, chief of the bureau. Having Bulletin No. 2 issued by the bureau, which contains lists of produce dealers in Alabama and leading cities of the country, the farmer selects half dozen, or as many more names as he wishes, from the lists and writes to each that he has, let us say, 10 tons of hay which he wishes to sell. In due course he will receive replies from the merchants to whom he

HARVESTING MACHINES

A CORNICK
mower for the
hay; a McCormick
binder for your
grain; a McCormick
corn binder to cut your
corn; a McCormick

husker and shredder to shred and husk your corn—a McCormick machine to fill your every need.

They are built right. We will treat you right, and you will find it to your interest to buy McCormick machines.

Singletary and Whiddon

has written, each quoting a price on hay to be delivered in his city, Birmingham, Selma, Montgomery, Mobile, Cincinnati or wherever else it may be. The farmer then goes to his local railroad agent and gets the freight rates to the different cities, deducts that from the prices quoted, and thus knows definitely what his hay

will bring him before he sells it."

The Bureau stands ready to advise individual farmers on matters connected with this method of doing business; all farmers who have not received Bulletin No. 2 are urged to write for it. It will be sent them postpaid.
